Maryland State Data Center

Affiliate Meeting

September 16, 2010

2010 ACS Schedule (tentative)

- September 28th- 2009 Single year data for areas over 65,000
- December – 5 yr.(2005-2009) data for all areas down to census tract; block group data will only be available in American FactFinder's summary files – *not in detailed tables where you can select an individual table*
- January – 3 yr. (2007-2009) data – all areas over 20,000
- See the ACS schedule handout

ACS Multiyear Estimates

- 3 year estimates areas greater than 20,000 persons
 - data aggregated for years 2007, 2008 & 2009;
- 5 year estimates available all areas
 - aggregated for years 2005, 2006, 2007, 2008 & 2009
- ***Don't mix and match – if using multiyear for an area don't compare to single year data for another area***

ACS Multiyear cont'd

- Multiyear estimates are more precise than single year because the sample size is larger
- Which is more important for your application -
currency of data – *use single year*
validity of data – *use multiyear*
- If geography is large (such as a metro county) -
using single year data may be acceptable and
provide information on the most recent changes
(look at the margin of error)

More Multiyear

- Estimates are based on boundaries of the last year (i.e. 2007-2009 city data would use the boundary as of Jan. 2009)
- All years in multiyear estimates are given the same weight; all months (36 for the 3 yr est.) are aggregated
- Dollar values such as income and housing value are adjusted with inflation factors to reflect the end year of the time period (ACS 2007-2009, *IN 2009 INFLATION-ADJUSTED DOLLARS*)
- Each year a new product is released; the earliest year is dropped and the most recent year is added (*2007-2009 will be 2008-2010 next year; 2005-2009 will be 2006-2010*)

ACS Methodology Review

About 250,000 surveys mailed each month nationally
Equal to about 3 million annually

Corresponds to a 1 in 40 sample size (approx. 2.5%);
decennial long form was 1 in 6 addresses (16.6%)

Census Bureau applies person and household weights ; Summing the weights produces the estimates

ACS is not meant to be used for “counts” of population or race, use the annual population estimates
ACS provides “characteristics” about the population

Finding ACS Data in American Factfinder

The screenshot shows the U.S. Census Bureau website interface. At the top, the header includes the U.S. Census Bureau logo, navigation links for FAQs, Subjects A to Z, and Help, along with a search bar and a GO button. The main content area features a large banner for the 2010 Census with the slogan "IT'S IN OUR HANDS". To the left of the banner is a sidebar menu with links: Grandparents Day, Facts for Features, New on the Site, Data Tools, American FactFinder (highlighted with a red arrow), Jobs@Census, Catalog, Publications, and Are You in a Survey?. Below the banner, there are links for News, Multimedia, Partners, Director's Blog, Census in Schools, and En Español. On the right side, a box displays the "National 72% Participation Rate" as of April 27, 2010. Below this, a "Data Finders" section includes a link to "Population Clocks" and the "U.S." label. At the bottom, a large red box contains the website address "www.census.gov".

Data Set: [2006-2008 American Community Survey 3-Year Estimates](#)
Survey: American Community Survey

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

NOTE: Data for the following geographic area(s) are not available. This table is only available for the United States.

Geography:
Prince George's County, Maryland

Data are not available for Prince George's County – only available for the U.S. may want to look at a collapsed version of the table

Why no data available – 63 Race Combinations

Total:

Population of one race:

White alone

Black or African American alone

American Indian and Alaska Native alone

Asian alone

Native Hawaiian and Other Pacific Islander alone

Some other race alone

Population of two or more races:

Population of two races:

White; Black or African American

Population of five races:

White; Black or African American; American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander

White; Black or African American; American Indian and Alaska Native; Asian; Some other race

White; Black or African American; American Indian and Alaska Native; Native Hawaiian and Other Pacific Islander; Some other race

White; Black or African American; Asian; Native Hawaiian and Other Pacific Islander; Some other race

White; American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander; Some other race

Black or African American; American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander; Some other race

Population of six races:

White; Black or African American; American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander; Some other race

C02003. RACE - Universe: TOTAL POPULATION ***COLLAPSED TABLE***
Data Set: 2006-2008 American Community Survey 3-Year Estimates

	Prince George's County, Maryland	
	Estimate	Margin of Error (+/-)
Total:	825,924	*****
Population of one race:	807,179	1,516
White	193,161	3,385
Black or African American	527,183	1,815
American Indian and Alaska Native	2,154	602
Asian alone	32,306	516
Native Hawaiian and Other Pacific Islander	834	562
Some other race	51,541	3,362
Population of two or more races:	18,745	1,516
Two races including Some other race	2,255	593
Two races excluding Some other race, and three or more races	16,490	1,568
Population of two races:	16,650	1,409
White; Black or African American	6,032	1,016
White; American Indian and Alaska Native	1,622	466
White; Asian	1,737	415
Black or African American; American Indian and Alaska Native	2,710	568
All other two race combinations	4,549	755
Population of three races	1,875	579
Population of four or more races	220	161

MARYLAND STATE DATA CENTER

Welcome to the SDC

The Maryland State Data Center (SDC) is an official partner with the U.S. Census Bureau. The Maryland Department of Planning coordinates the SDC program in Maryland.

The SDC monitors development trends, analyzes social, economic and other characteristics and prepares population, housing, employment, labor force, and income projections, which provide the baseline for planning for growth and development in the State.

This page is maintained by the Maryland State Data Center Staff. Questions, comments, and/or suggestions should be directed to the Maryland State Data Center

Geographies with a Population Over 20,000 for 2007

Geographies With a Population Over 65,000 for 2006 and 2005

Jurisdictions With a Population Over 250,000 and Calvert County Test Site for 2002 to 2004

▶ Single Year : 2008 **new** || 2007 || 2006 || 2005 || 2004 || 2003 || 2002

▶ Multi-Year : 2006 to 2008 **new** || 2005 to 2007

▶ Socioeconomic Characteristics for Maryland's Jurisdictions and Places : 2006 to 2008 **new** || 2005 to 2007 

▶ To Calculate If Two Estimates are Statistically Significant 

Spreadsheet to Calculate ACS Margins of Error and Statistical Significance for Sums, Proportions and Ratios. This calculator, updated 2/23/2009, from the New York Data Center allows users to produce the margins of error for the ACS when combining counts or proportions for a number of geographic areas. It also allows users to test significant differences between two estimates.

Calculate the statistical significance of the difference between two estimates

Go

Usage Notes: This calculator can be used to determine if the difference between two estimates is statistically significant at the 90% confidence level. It can also be used to calculate the 90% margins of error for various combinations of estimates. The estimates can be at two different points in time or two different geographic areas. The estimates can be means, medians, number of people/households/housing units, ratios, or proportions.
